Action – Help Us Help You

Is there something we can do or should know about you that would nurture your spiritual life while you are in the hospital?

Are there religious/spiritual practices of yours we should know about that you feel are important in your healing?

Would a visit from a hospital Chaplain, or another spiritual care leader from the outside community, be helpful at this time?

Your nurse or physician will be happy to contact a chaplain for you, or you may call direct at 503-216-2261.
