

**CHAPLAIN HEROES**  
*We are your Listening Heart*

We continue to hold you, our Chaplain Heroes, with deep gratitude for your commitment to care for patients, families and staff during this time of the COVID-19 Pandemic. Ministering to others in this time is extremely challenging. Many of you are ministering with new protocols and new methodologies. In addition, you are faced with your own emotions in ways like no other time in your work as a chaplain. We want to hold with you, your feelings and concerns. **Many NACC retired chaplains and clinical educators, who understand the work that is yours to do, are here for YOU as you care for the patients, find ways to communicate with families and attend to the overwhelming needs of the leadership and clinical teams across your health system or in your hospital.** Please reach out for a Listening Heart. We are with you on this journey and hold you in prayer. You are also invited to reach out to talk with a Listening Heart if you have any other life concern, challenge or just need someone to hold with you the story of your life. We walk alongside you and are so grateful for you who are doing the important work of spiritual care with patients, residents, families and staff.
